Section 2: Scope of Works

Provision of Equipment and Services for the Modernization of the Information Division

Scope of Works

2.1 Background

The Information Division (MOC), in its responsibility and mission "To produce credible, educational and entertaining multimedia products that meet the needs of the Government and People of the Republic of Trinidad and Tobago" is desirous of modernizing its operations.

In the 1940's the British Government set up the Colonial Office of Information in Trinidad. This specialized agency was created to handle the dissemination of official government information. Its main function was to keep the population informed about what was happening during World War 11. It received all its information from the British Government through the Colonial Office in London.

At that time the colony had a semi-representative form of Government with the Governor acting as the Queen's representative and a Legislative Council. The Public Relations Officer was seen as the link between the representatives and the people.

After Independence, the new Government now had the responsibility to its own citizens and the late Dr. Eric Williams set up a Unit to do this and he called it the Public Relations Unit of the Office of the Prime Minister (OPM). Subsequently it was renamed, the Information Division (ID).

The Information Division (ID) has been for many years working with old and outdated equipment, software and facility which could not have been upgraded via the extremely limited annual recurrent budgetary allocation. As the need for services continue to grow, the Information Division struggle to keep

up with the demand and quality standards. Today's demand requires that the Information Division has to increase its ability to:

- I. Capture and Edit Audio\ Visual "on the fly" while transmitting such media to the various Stakeholders within reasonably quick period of time.
- 2. Produce quality productions (videos, pictures, Audio) which are Industry Standard and in modern compatible formats.
- 3. To store content in such a manner that they are easily accessible; currently media has to be searched in a warehouse, then digitized, edited before utilization. This takes a long time from inception to utilization, which can be reduced to minutes once a proper modernization takes place.
- 4. Historical data stored on External Hard Drives, CDs, DVDs, Cassettes, Pneumatic tapes and Negatives fall victim to detoriation. This leads to the permanent loss of historical data. These data must be digitized and stored in a Storage Solution.
- 5. Loss of opportunity to offer all media pieces in the custody of the Information Division because of its analogue state to stakeholders. This leads to loss of opportunity to Monetize the media pieces and disseminate to the benefit of the population.

In this regard, the office of the Prime Minister-Communications is desirous in acquiring hardware, equipment, software and training required to modernization the operations of the Information Division.
